Code

Routes

```
<?php

use Illuminate\Support\Facades\Route;
use App\Http\Controllers\SiteController;
use App\Http\Controllers\ProductController;

// Halaman utama langsung diarahkan ke login
Route::get('/', function () {
    return view('login');
});

// Halaman login
Route::get('/login', function () {
    return view('login');
});

// Proses login
Route::post('/auth', [SiteController::class, 'auth']->name('auth'));

// Route resource untuk ProductController
Route::resource('products', ProductController::class);
```

View

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Login</title>

    <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/css/bootstrap.min.css"
    rel="stylesheet">

    <script src="{{ asset('js/jquery.min.js') }}"></script>
</head>
<body class="bg-light">

    <div class="container">
        <div class="row justify-content-center align-items-center min-vh-100">
```

```

<div class="col-md-4">

    <div class="card">
        <div class="card-body">
            <h3 class="card-title text-center mb-4">Login</h3>

            <form method="POST" action="{{ route('auth') }}">
                @csrf

                <div class="mb-3">
                    <label for="email" class="form-label">Email</label>
                    <input type="email" name="email" id="email" class="form-control"
required>

                </div>

                <div class="mb-3">
                    <label for="password" class="form-label">Password</label>
                    <input type="password" name="password" id="password" class="form-
control" required>

                </div>

                <div class="d-grid">
                    <button type="submit" class="btn btn-primary">Login</button>
                </div>
            </form>

        </div>
    </div>

</div>
</div>
</div>

<script
src="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/js/bootstrap.bundle.min.js"></script>
>

</body>
</html>

```

Controllers

```

<?php

namespace App\Http\Controllers;

use Illuminate\Http\Request;

class SiteController extends Controller
{
    public function auth(Request $request)
    {
        $email = $request->input('email');

        return "Login berhasil diproses. Email yang dimasukkan adalah: " . $email;
    }
}

```

```

<?php

```

```
namespace App\Http\Controllers;

use Illuminate\Http\Request;

class ProductController extends Controller
{
    public function index()
    {
        return "Ini adalah halaman daftar produk";
    }

    public function create()
    {
        return "Ini adalah halaman tambah produk";
    }

    public function store(Request $request)
    {
        return "Data produk berhasil disimpan";
    }

    public function show($id)
    {
        return "Ini adalah detail produk dengan ID: " . $id;
    }

    public function edit($id)
    {
        return "Ini adalah halaman edit produk dengan ID: " . $id;
    }

    public function update(Request $request, $id)
    {
        return "Data produk dengan ID " . $id . " berhasil diperbarui";
    }

    public function destroy($id)
    {
        return "Data produk dengan ID " . $id . " berhasil dihapus";
    }
}
```

Screenshoot program

Penjelasan kode dan output

Pada praktikum ini, Laravel diinstal menggunakan Composer melalui perintah `composer create-project laravel/laravel`. Setelah proses instalasi selesai, project Laravel dijalankan dengan perintah `php artisan serve`. Perintah tersebut berfungsi untuk mengaktifkan server lokal Laravel sehingga aplikasi dapat diakses melalui browser menggunakan alamat `http://127.0.0.1:8000`.

Kode routing dibuat pada file `routes/web.php`. Pada file tersebut terdapat route untuk menampilkan halaman utama, halaman login, proses autentikasi melalui method POST, serta route resource untuk halaman produk. Route `/login` digunakan untuk menampilkan file view `login.blade.php`, sedangkan route `/auth` diarahkan ke method `auth()` pada `SiteController` untuk memproses data email dan password yang dikirim dari form login.

Output dari program menunjukkan bahwa halaman login berhasil ditampilkan pada browser. Setelah pengguna mengisi email dan password lalu menekan tombol Login, sistem menampilkan pesan "Login berhasil diproses" beserta email yang dimasukkan. Selain itu, route `/products` juga berhasil dijalankan melalui `ProductController` dan menampilkan teks "Ini adalah halaman daftar produk", sehingga dapat disimpulkan bahwa bagian instalasi Laravel, routing, view, dan controller sudah berjalan dengan baik.
